

Thank you for the gift of a Church in Community workshop

Malawi is one of the world's poorest countries. It is also replete with churches: 85 percent of the population is Christian, and every community has at least one church. **The potential for change brought about by the local church in Malawi is gigantic.** And God calls the church to serve. Church in Community workshops engage local congregations in addressing their communities' needs.

World Renew and its national church partners in southern Africa embarked on the Church in Community project three years ago to help local churches not only evangelize their neighbors but also serve them as the body of Christ. The program, as is World Renew's ministry, aims to empower congregations as partners in the work of development rather than just as recipients. So far, 60 congregations have undergone training in biblical and management principles that have allowed them to become drivers for change rather than spectators.

Your gift will support another congregation in identifying and addressing common challenges by working together and sharing resources. Congregations who have taken Church in Community training have stepped up to care for orphans, support the elderly, send children to school, and organize community water projects.

Your gift of a Church in Community workshop will, in the words of Ephesians 4, "equip the saints for the work of ministry, for the building up of the body of Christ." It is key to Uzima, truly abundant life.

THANK YOU

"... I HAVE COME THAT THEY MAY HAVE LIFE, AND HAVE IT TO THE FULL."

—John 10:10
