Thank you for giving the gift of **drinking water in an emergency**

Humans cannot survive without water for more than a week. In order to live, we will risk disease and even death by drinking dirty water. **When disaster survivors are struggling to persevere, dirty water can compound their suffering.**

World Renew's established relationships with partners around the world allow us to engage in rapid disaster response that saves lives. Safe drinking water is a crucial part of responding to disasters internationally. **Your gift of water in an emergency supplies emergency filters, filtration systems, and other clean water provisions that prevent illness and help families stay healthy as they face the challenges of recovery and rehabilitation.**

World Renew's international disaster response efforts recently included challenges as varied as flooding in the Indian state of Kerala that disrupted thousands of families, Typhoon Mangkhut in the Philippines that displaced thousands in northern Luzon, and the ongoing crisis of Rohingya refugees in Bangladesh. In each instance, we address the most basic life needs of survivors, such as drinking water — compelled by Christ's promise that He is "a spring of water welling up to eternal life." In offering help and hope to people in times of great need, World Renew shares the abundant life that God intends for all.

Survivors of disaster struggle to return to everyday life. Your gift of drinking water in an emergency allows them to focus on recovery, not relapse.

THANK YOU

"... I HAVE COME THAT THEY MAY HAVE LIFE, AND HAVE IT TO THE FULL."

—John 10:10
