## Thank you for giving the gift of **an HIV test kit**

Ninty percent of children who live with HIV were infected by their mother during pregnancy, childbirth, or breastfeeding. What a devastation for mother and child. **But for mothers who are tested while pregnant, medicine can prevent transmission of the disease to the child and also offer her life-giving health. Early detection and treatment are essential to stopping the spread of HIV.**

Nigeria is home to the second-largest population of HIV-positive people in the world, and a third of mother-to-child transmissions happen there. For people living in rural or remote areas, **just getting tested for HIV is a challenge.** Through World Renew's Nigerian partner, Beacon of Hope Initiative, people with little access to health services can receive prevention education, care for orphans and vulnerable children, and HIV testing.

**Your gift of an HIV test kit provides a man or woman with a blood test, results, and counseling with a local, World Renew-trained health volunteer who can guide that person to the support, education, and medical treatment they may need.** By offering access to these simple tests in the context of a local church, Beacon of Hope hopes to address stigma in the church setting and provide spiritual support for worried families.

God wants abundant life for His children. **Your gift of an HIV test is the door to health and transformation for a mother and child, today and for the future.**

## THANK YOU

**“... I HAVE COME THAT THEY MAY HAVE LIFE, AND HAVE IT TO THE FULL.”**

—John 10:10
