

## Making a Difference One Step at a Time

Healthy Living affects every part of life: it includes caring for people who have HIV, monitoring mothers and babies, ensuring nourishment and food security, and working together to create better financial health as a community.

Step into a developing community with World Renew staff and meet people who are building healthier lifestyles from the ground up. Experience hope and learn from community members about the importance of health, education, literacy, food production, and food security in ending poverty and hunger worldwide.

## Why Healthy Living?

World Renew emphasizes Healthy Living in the communities where we work as a part of an integrated approach to addressing poverty and hunger worldwide.

In Tanzania and Kenya, World Renew's Healthy Living programs include HIV and AIDS response, training that is highly participatory, and organizing that is community-led. Recently, community groups added training in sexual and reproductive health and human trafficking prevention to their efforts.

## Why You?

The Healthy Living Tour is a learning opportunity in which you are an active participant, sharing your skills in training sessions in health, entrepreneurship, agriculture, livelihoods, and village savings and loans.

You will experience innovative, participatory learning methods and witness how communities address their challenges. You will see that healthy lifestyles improve cooperation and sustainability.

There isn't a quick fix for unhealthy living, but together as God's people, we can take a step at a time toward Healthy Living with communities in Tanzania and Kenya.
