Thank you for giving the gift of **medicine**

Jesus said that He came so that we might have life and have it abundantly. He also said that when we welcome a child in His name, we welcome him. World Renew wants what Jesus wants for the children of Honduras.

In Honduras, malnutrition is a burden many children carry for life; the rates of stunting (growth impeded by poor nutrition) in Honduras range from 23 percent to 40 percent in rural areas. When children don't get enough nutrition to build their body, their brain, and their immune system, their opportunity for an abundant life shrinks.

One threat common to malnutrition among young children is infection by parasites, which hampers the absorption of nutrients critical to growth and thwarts the most well-meaning parents' attempts to care for their little ones. **World Renew works with community health centers and village nurses in Honduras to help prevent malnutrition in young children.**

Maria and Erlin Arely knew something was wrong when their 9-month-old daughter, Dayana, started losing weight and having trouble walking. A visit to the doctor at the community health center confirmed their fears: malnutrition. But Dayana received medicine for a parasitical infection, and her parents received support for a more nutritious diet for their daughter. **These simple interventions restored Dayana's growth to a normal rate, returning to her the possibility of a lifetime of good health.**

World Renew connects with hundreds of mothers and their children in Honduras through comprehensive community programs that include maternal and child healthcare and support. **Your gift of medicine from the World Renew gift catalog is a precious part of the wholeness children in Honduras need so that they may have a more abundant life.**

THANK YOU

"... I HAVE COME THAT THEY MAY HAVE LIFE, AND HAVE IT TO THE FULL."

—John 10:10
